CORTECO OIL DRAIN PLUG KITS

CORTECO, the leading specialist for the independent automotive aftermarket, has now expanded its portfolio by a large selection of **34 oil drain plug kits**. CORTECO is able to offer not only oil drain seal rings, but also pre-assembled oil drain plug kits. With increasingly longer oil change intervals it is vital to change the seal and the oil drain plug in order to achieve perfect sealing, particularly important for workshop customers who are not prepared to risk any environmental pollution through dripping oil sumps. Many oil drain plugs are also damaged through unprofessional disassembly, which means that the demand for CORTECO plug kits for oil changes, consisting of plug and matching seal, is considerable. perfect sealing.

These pre-assembled plug kits are packed in blisters and can be hung up in display racks. Placed directly next to engine oils, they will offer a significant opportunity for additional business. Apart from a product description, stating the plug thread diameter and the seal diameter, the blisters also contain a list of the matching vehicles, sorted by brand and model.

The table shows examples of the CORTECO 34 new oil drain plug kits for 9.268 vehicle applications:

CORTECO	Manufacturer	Model	Year of construction
220100S	Renault	Twingo I 1.2 / Scénic 1.16 16V	05.1996 ->
