PLUG & SEAL CONNECTORS FOR MAN

HIGH-SPEED MOUNTABLE PLUG CONNECTORS FOR OIL AND COOLING CIRCUITS

CORTECO the Aftermarket Specialist of the Freudenberg Group, offers you innovative products like the Plug & Seal connector. The Plug & Seal connector is patented by Freudenberg and is being increasingly used by different vehicle manufacturers due to the advantages it offers them.

Plug & Seal Connectors are pipe sections with a rubberised outer surface with sealing beads and stop dampers. They are used to establish a tight connection between two housings or units – and for secure transport of media such as oils, water or air.

CORTECO's product program already covers 12 Plug & Sealing Connectors for MAN, which offer many advantages:

- they provide a simple, safe and economical fitting
- acoustic and mechanical decoupling
- reduce the amount of maintenance through improved durability
- large tolerances in installation are permissible

Freudenberg Plug & Seal-Connectors – now available in the aftermarket. Exclusively by CORTECO!
