

CABIN AIR FILTER

Nearly one in two new cars equipped with cabin air filtration are fitted, as standard, with a Freudenberg micronAir® filter.

Due to the strong connection between Corteco and Freudenberg, most cabin air filters that are new in range, are also **First-to-Market**.

These filters are fitted as OE and are available either as particle or combi filters.

Selection of the new cabin air filters in range 07/2017:
