Pulley + Bolt Kit

SIMPLE AND SAFE

Pulleys should be checked every 90,000 km and replaced together with the bolts and belts. Replacement bolts were difficult to identify and source, other than through a dealer. CORTECO offer you the widest selection in original quality from Freudenberg, the world's leading manufacturer of vibration technology products. Purposely designed original pulleys and bolts guarantee straightforward assembly and the highest degree of safety. CORTECO's portfolio comprises of more than 190 pulleys. CORTECO offers more than 20 of them in a kit: pulley + bolts.

New bolts are a must!

CORTECO recommend replacing the bolts with the pulley. Reason: In serial production torque-to-yield (TTY) bolts are often used which are tightened by automatic bolt tightening devices to just above their elasticity range. Re-using such bolts poses considerable safety risks and is not recommended. Result: the bolts becoming loose or even breaking.

CORTECO pulley + bolts kit - your benefits:

- All necessary bolts and washers plus pulley in one kit
- Easy identification in TecDoc via OE number of the pulley or vehicle application
- Optimized package protects the parts from transport damage
- Time-saving through easy sourcing
- Simple assembly and increased safety
- Compliance with OE requirements

As usual all kits with mounting instructions.

Additional instructions for mounting on the package.
